CASE STUDY

Non-transparent reporting of expenses

In consolidated statement for 2024, PES does not state individual expenses at all, but only total amounts, which makes it almost completely impossible to analyse the financing of that political party. This is how PES acted in 2024, even though it had been warned by the State Audit Institution in 2022 that it was obliged to properly fill out the prescribed forms for consolidated statements.

In the report for 2024, the PES presented only the sum of other expenses incurred on the basis of the regular operations of that political entity in the amount of 928 thousand euros.

In the same way, the party only stated the sum of payments for salaries and other allowance.

In addition, in the Data on expenses of the political entity, PES **did not report the expenses of the election campaign in 2024 at all**. On the other hand, total amount of those expenses **is stated in the summary report**, which contains all other expenses.

Photo 9: Summary report on revenues and expenses Source: Consolidated financial statement of the PES for 2024 This is particularly significant bearing in mind that the State Audit Institution (SAI) stated in its report for 2022:

"Upon inspection of the Annual Consolidated Financial Statement of the Party for 2022, it was determined that the Party, within the framework of the annual financial statement of the political entity, did not prepare the Balance Sheet and the Income Statement on the prescribed forms, in accordance with the valid Rulebook on the form of the annual consolidated financial statement of the political entity..." [3]

Namely, in the consolidated report for 2022, some parts were not filled out at all.

Thus, as early as 2022, SAI pointed out to PES the importance of filling out the prescribed form, but that party continued to make omissions in 2024 as well, which drastically reduce the transparency of its funding and the possibility of public control.
